

<p style="text-align: center;">Endorsement 111 Special Conditions Concerning Removal Of Landslides, Detritus And Discharge</p>
--

It is agreed and understood that otherwise subject to the terms, exclusions, provisions and conditions contained in the Policy or endorsed thereon, the Insurers will not indemnify the Insured in respect of:

- expenses incurred for the removal of landslides, regardless of their cause, having their origin-outside the limits of the insured contract works (These limits are marked by the vertical projections of the intersecting lines of the designed slopes with the existing natural terrain. If a landslide has its origin partially outside the aforementioned limits, the indemnity shall be restricted to that part of the landslide, which has its origin within this limits.),
- expenses incurred for the repair or eroded slopes or other graded areas, if the Insured has failed to take the measures required or to take them in time,
- expenses incurred for the removal of foreign matter from trenches and culverts,
- expenses incurred for the removal of sand and snow drifts,
- expenses incurred for additional insulation and facilities for the discharge of run-off and/or underground water,
- loss or damage resulting from the Insured's failure to immediately remove obstructions (sand, silt, detritus) from watercourses.
- loss or damage resulting from faulty design, such as loss or damage due to inadequately designed slopes, the lack or inadequacy of retaining walls, drainage systems, culverts and/or interlocking of filled material and natural terrain.
