

<p style="text-align: center;">Endorsement 117 Special Conditions For Laying Water Supply And Sewer Pipes</p>

It is agreed and understood that otherwise subject to the terms, exclusions, provisions and conditions contained in the policy or endorsed thereon, the Insurers will indemnify the Insured for any loss, damage or liability due to the flooding or silting of pipes, trenches or shafts, only up to a maximum length of open trench, partially or completely excavated, of many one loss event.

The Insurers shall be liable only if

1. the pipes, immediately after laying, have been secured in such a manner by backfiring that they cannot be displaced if the trench is flooded;
2. the pipes, immediately after laying, have been closed to prevent water, silt or the like penetrating;
3. the trenches of tested pipe section have been backfield immediately upon completion of the pressure test.
