

## Accidental Derangement Of Fire Protection System

The insurance covers:

1. Loss or damage directly caused by :
  - 1.a. water or any other product accidentally released by or from the fire protection systems installed in the insured premises
  - 1.b. Collapse, breakage or fall of all or part of the fire protection systems.
2. Liability to neighbors and third parties for property damage caused to the by any of the events listed in (a) above.

The definition of "fire protection systems" includes tanks, water mains, pipes, hydrants or valves and any other equipment whether used solely for fire fighting or jointly for fire fighting and other purposes.

### **THE SCOPE OF THIS COVERAGE DOES NOT INCLUDE LOSS OR DAMAGE CAUSED BY:**

1. Pipes connected to a common network whenever such pipes are entirely used for purposes other than fire protection
2. Underground water pipes or mains or their accessories being part of the city water distribution network
3. Repairs or changes to the buildings or premises or works or extensions to the installation of the fire fighting equipment or pipes or tanks and any other appliances
4. Loss or damage to the installation itself, tear and wear, repairs or displacement or pipes, mains or apparatus following a loss
